

SAFETY RECALL

Delta Enterprise Corp. Lift N Push Drop Side Cribs To Secure Drop Sides

The cribs' drop-sides may detach or otherwise fail, causing part of the drop side to fall out of position, creating a space into which an infant or toddler can roll and become entrapped, which can lead to strangulation. A child can also fall out of the crib. Drop side incidents can also occur due to incorrect assembly and with age-related wear and tear. The name and model number is printed on a label attached to the mattress support platform.
